CONTENTS

1. Connecting your device with Airport Utility
2. Connecting with iTunes

Before you begin the installation, make sure that your La Rosita device is turned ON, and that your network is secured by a password.

Please also install the supplied La Rosita Plugin on your Apple computer (if you do not have one, go to our Web site [*insérer lien*] to register and get your plugin).

This guide is based on the operating system OS X 10.9.x (Mavericks), and the Airport Utility software version 6.3.2. The instructions contained in this Manual are valid for the V2 and V3 versions of La Rosita devices.

1. Connecting your device with Airport Utility

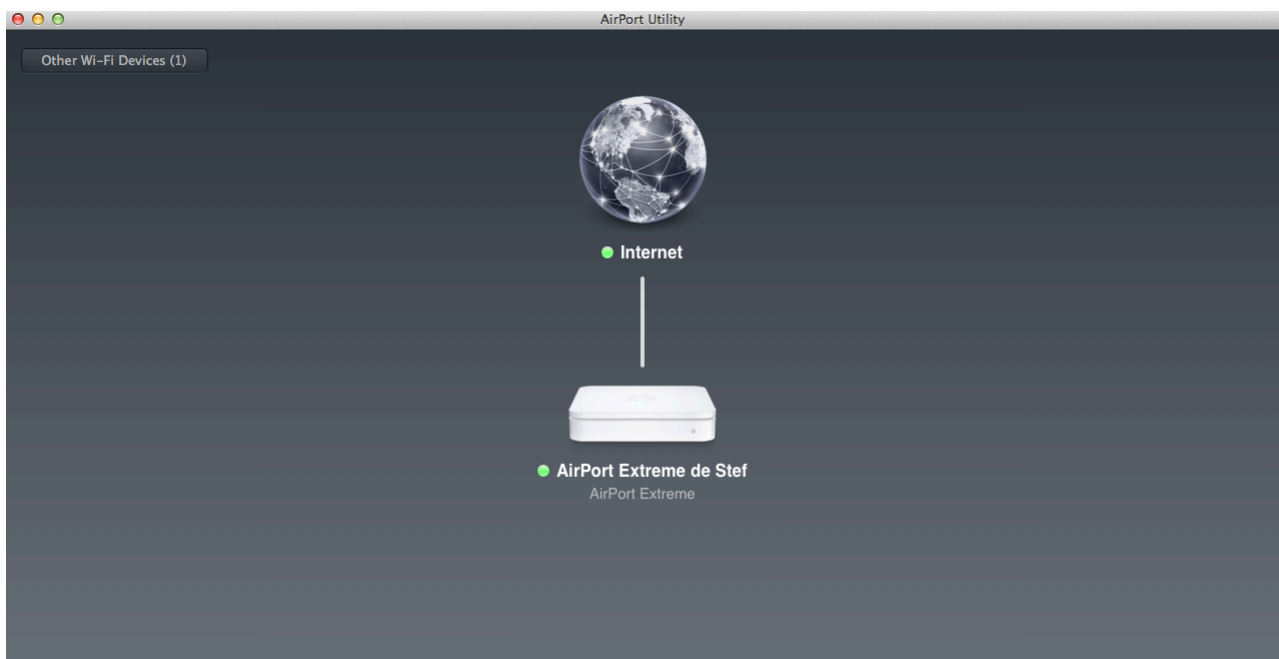

Press and hold the Reset button on the back of your La Rosita device for approximately 10 seconds until the orange LED starts flashing quickly, then release.

Launch Airport Utility and wait... It can take up to 50 seconds for the application to boot up.

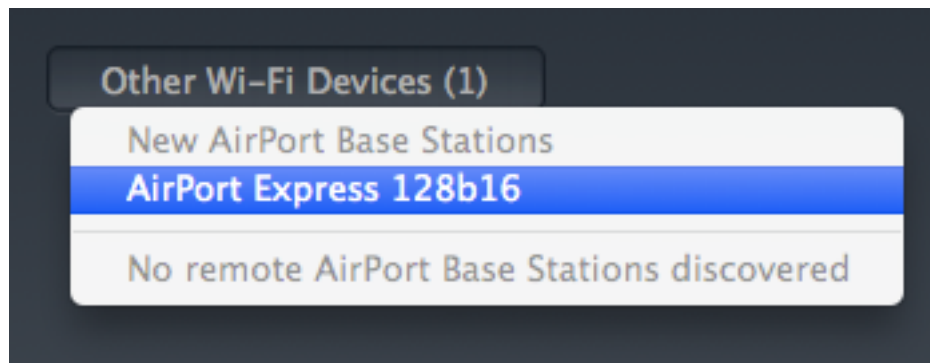

Make sure that your wireless network (WiFi) is turned ON.

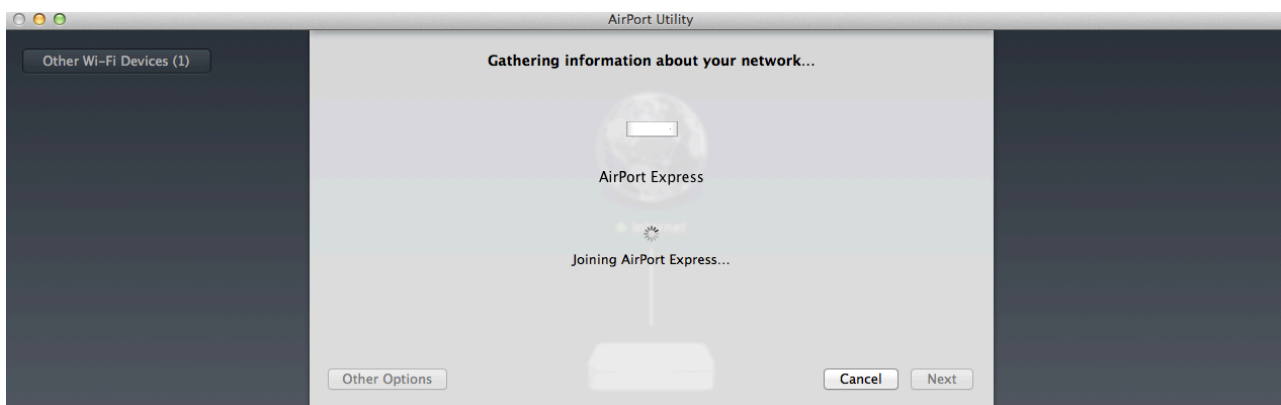

After approximately 2 minutes, Airport Utility will recognize your La Rosita device.

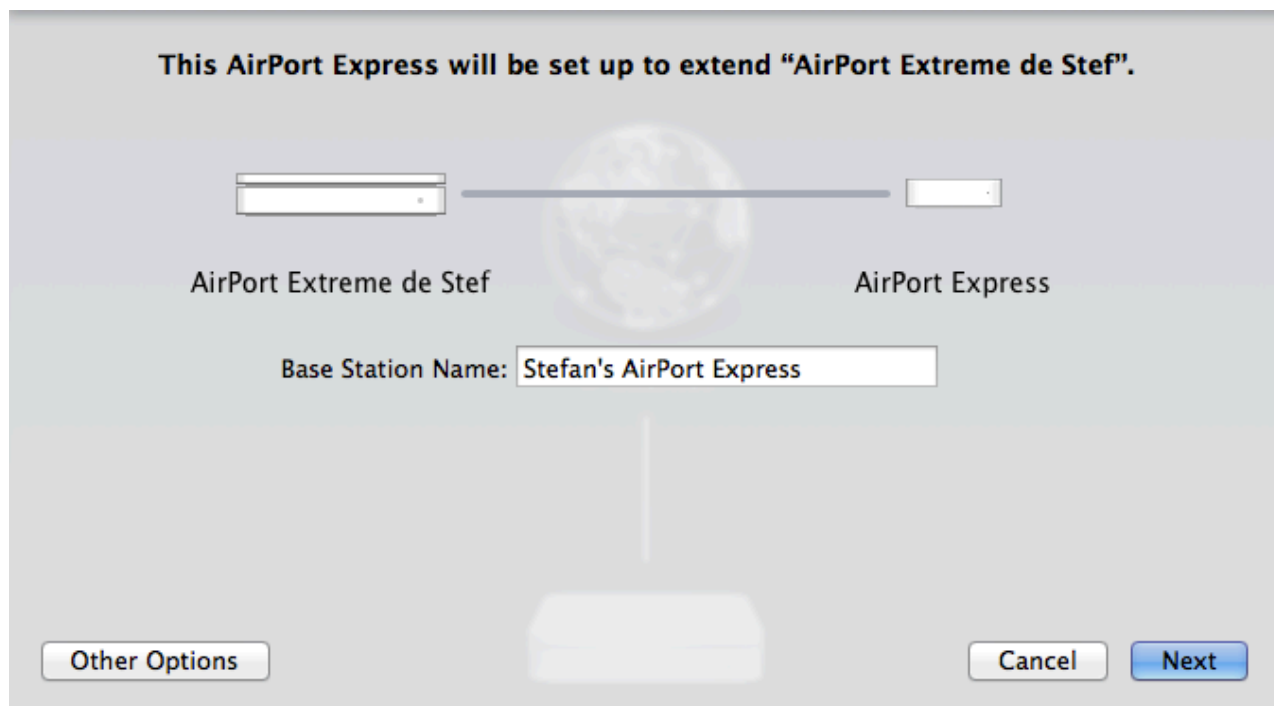

Click on “Other Wi-Fi Devices (1)”, and select your La_Rosita device which will appear as a “Airport Express” with its identification number (see below).

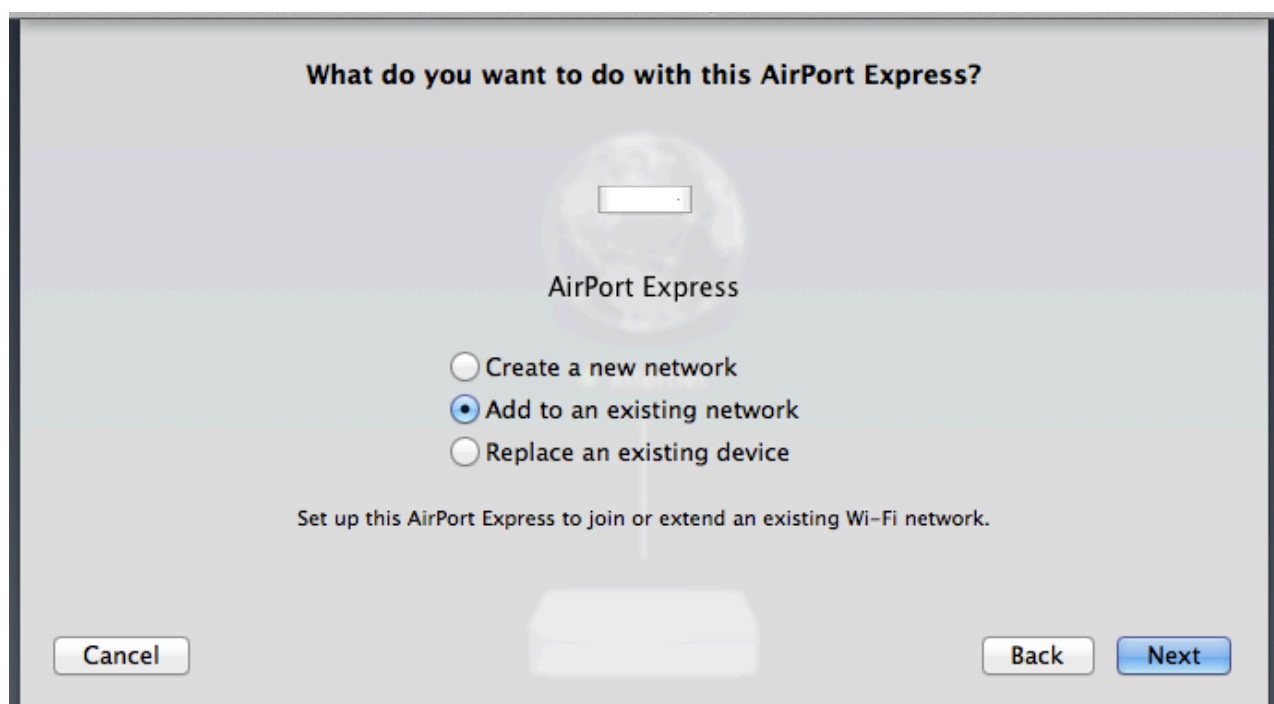

The following window will then appear:

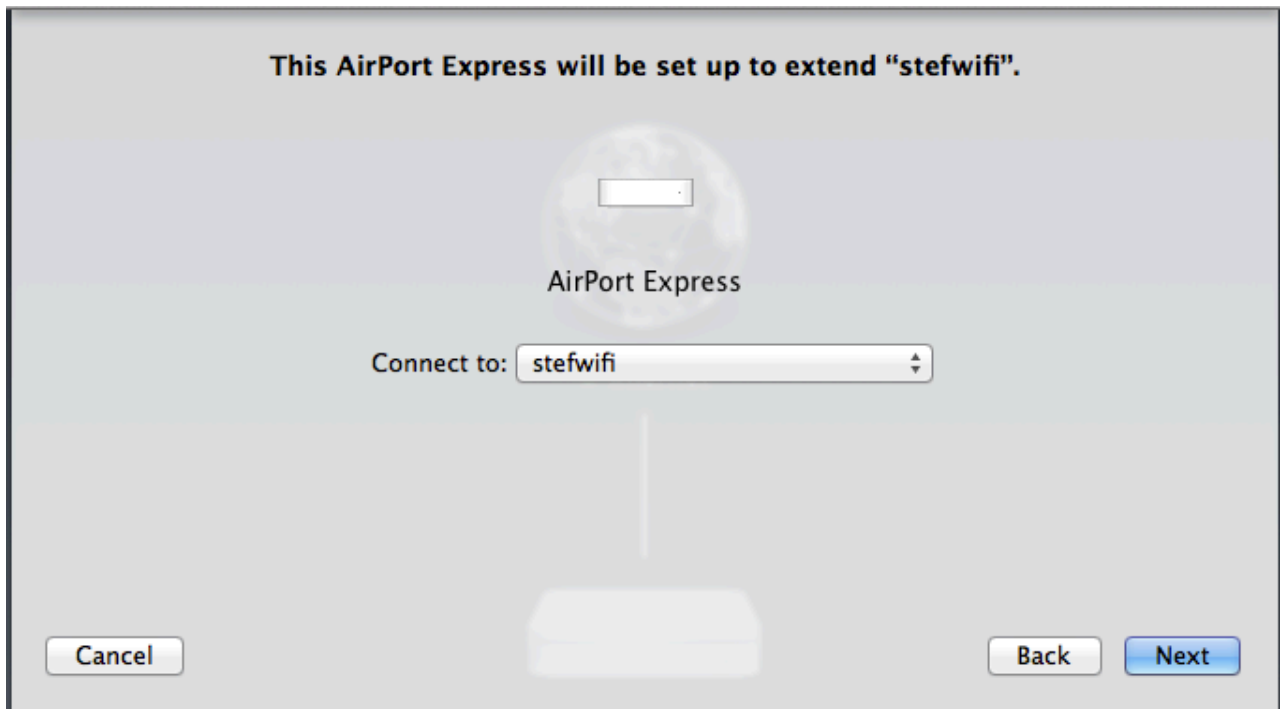

Wait until the necessary data is collected, at which point the next window will appear.

Click on " Other Options", and select "Add to an existing network".

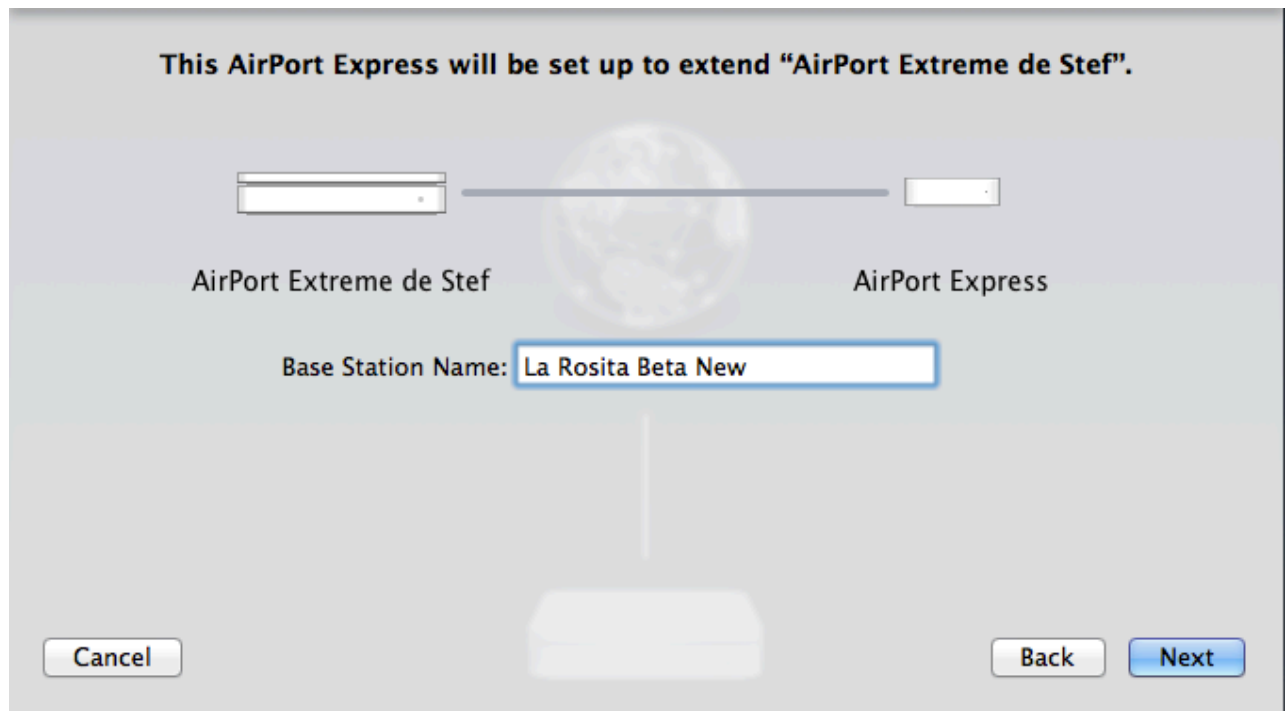

Select your wireless network (exemple here is "stefwifi") to which your La Rosita device will be connected.

Click on the "Next" button.

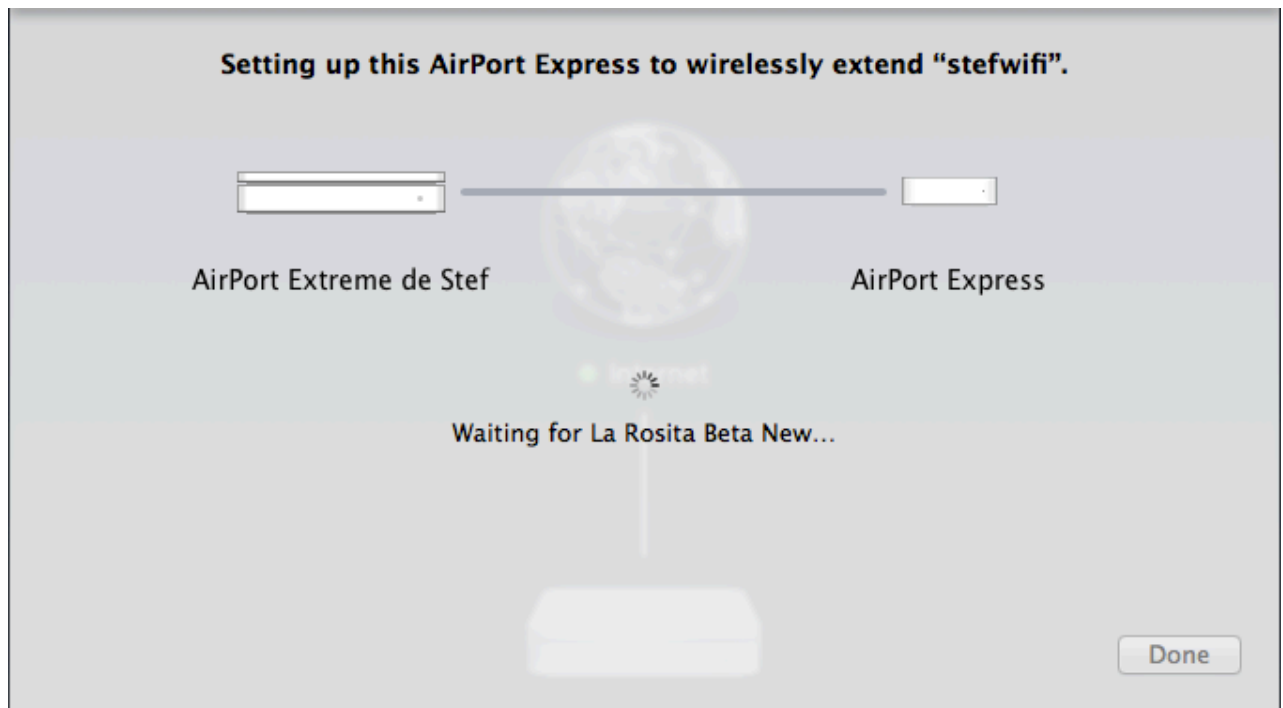

Give a name to your La Rosita device, and type in a password (minimum 4 characters) if requested.

▪

(Please note that Airport Utility sometimes doesn't ask for a password because it's already recorded on your computer)

By clicking on the “Next” button, the settings are sent to your La Rosita device. This may take up to 3 minutes.

After the successful configuration is displayed in Airport Utility, the “Done” button becomes active. Click on it, and you will see the last window displaying the (functioning) wireless connection between your La_Rosita device and your WiFi network.

2. Connecting with iTunes

1. Open iTunes
2. Click the top left of the icon "Speaker Select"

3. Select your device. If you have installed the La_Rosita Plugin, stay in computer mode (rather than selecting your La Rosita device).

For the setup of the plugin, please see the La_Rosita Plugin Manual.

4. Click on "Play"

Enjoy your La Rosita Device ! 😊
